e-Safety Awareness in Schools

Thursday, 21st March 2013

Alan Drew

Create IT

Today's Agenda

We will:

- explore issues related to the school's safeguarding policy with particular reference to e-security and e-safety;
- explore a range of curriculum resources and approaches to addressing these areas;
- consider some support available to parents

Safeguarding . . .

. . . is one of the areas that Ofsted pays special attention to and if it is found wanting can trigger an 'unsatisfactory' judgement.

Inspectors will look at two elements in particular:

e-security (whether the school treats sensitive data appropriately)
and

e-safety (how e-aware children are and how safe they feel)

The school e-Safety policy . . .

. . . will cover:

the enactment of the pupil and staff (governor & visitor) Acceptable Use Agreement

the monitoring of pupil internet use and checking of e-mail content

curriculum guidance for pupils

use of school e-mail

correct use of passwords

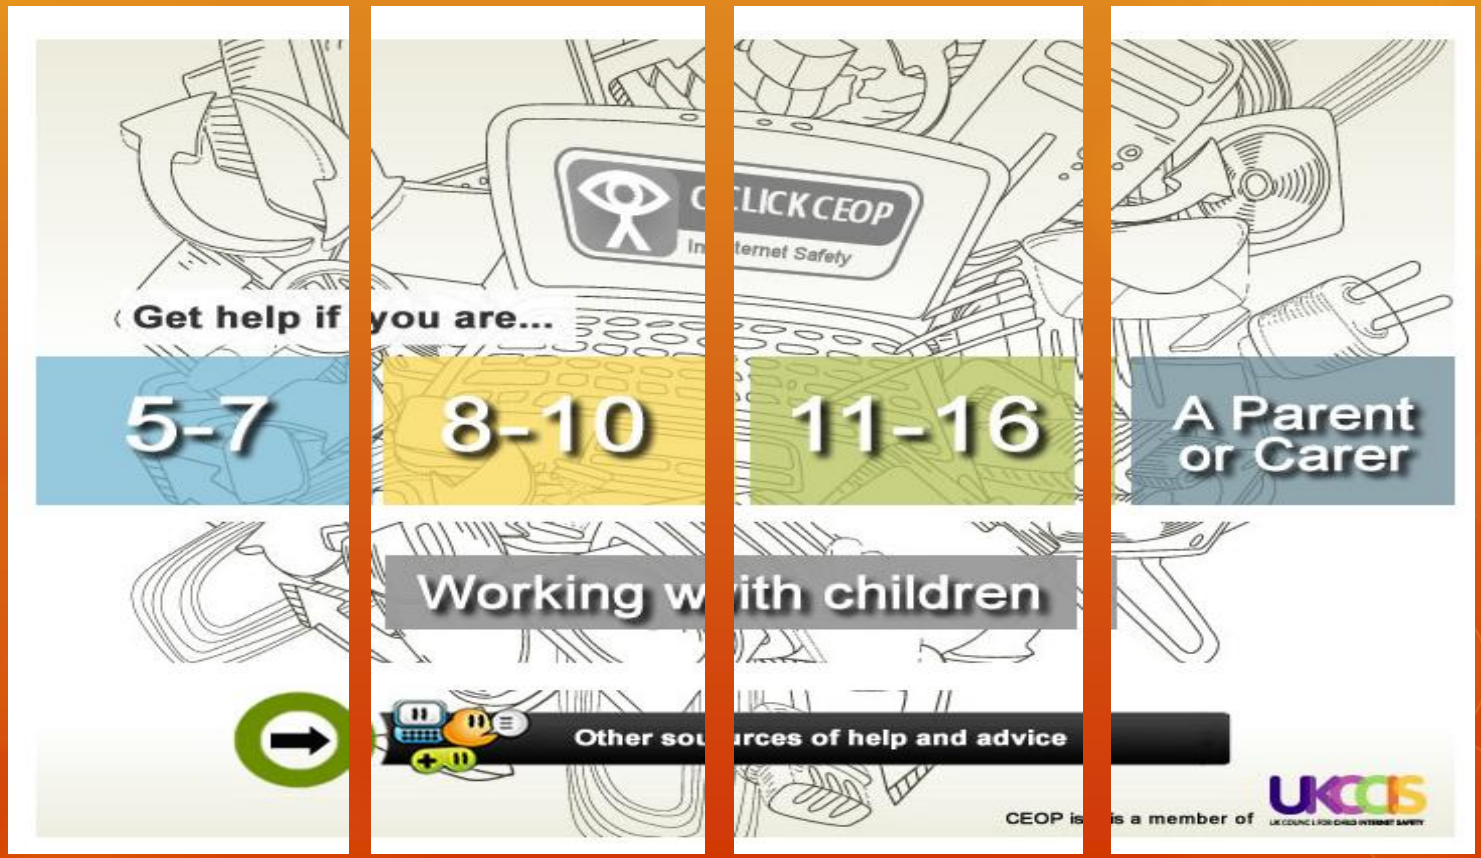

installation of software

disposal of redundant ICT equipment

safe use of images

removable devices

Hector's World Safety Button™

The Hector's World Safety Button is a free download to help protect you when you are on the computer. Ask your teacher or parent to help you choose the right Safety Button from the list below.

After they have installed the Button, a Hector's World character will swim in the top right-hand corner of your computer screen.

If you see something that makes you feel confused or scared when you are using the computer, you can click on Hector (or one of his friends) to cover the screen while you get some help.

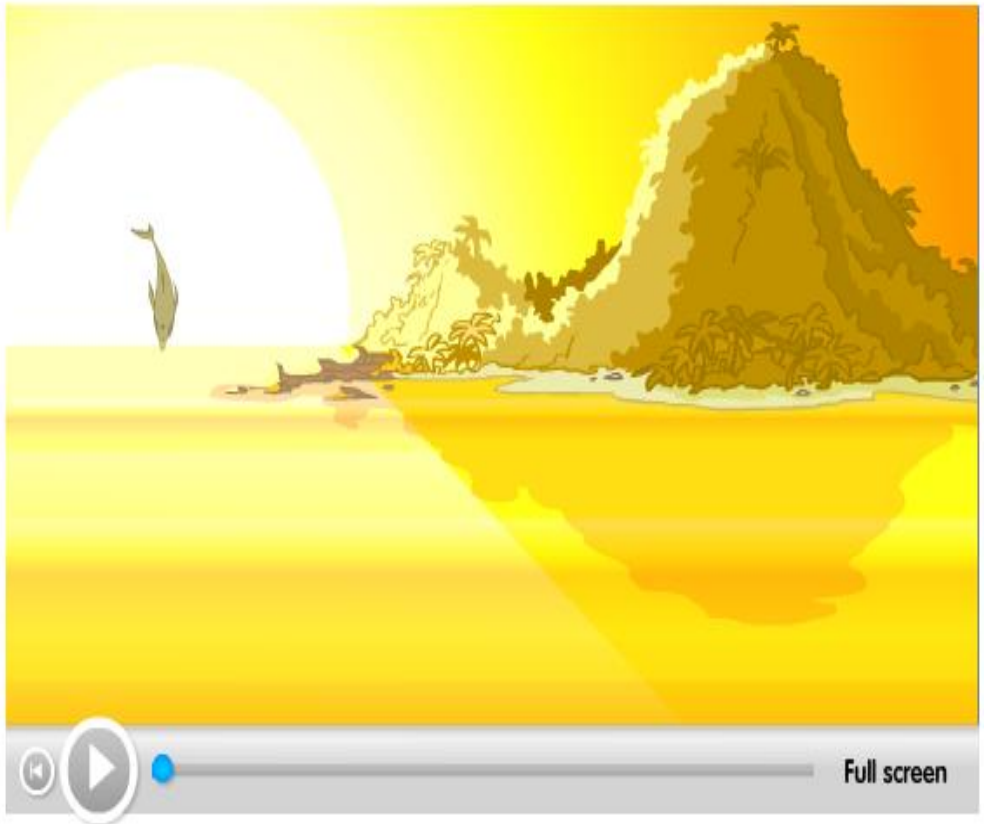

You could also ask your teacher about using the Hector's World Safety Button at school.

Click Clever, Click Safe campaign

- The UKCCIS (UK Council for Child Internet Safety) public awareness campaign was launched on *Safer Internet Day* on 9 February 2010.
- At the heart of the campaign was the ***Click Clever, Click Safe*** code.

Zip it: Keep your personal stuff private and think about what you say and do online

Block it: Block people who send you nasty messages and don't open unknown links and attachments

Flag it: Flag up with someone you trust if anything upsets you or if someone asks to meet you offline

Internet safety: Caught in the Web

Quiz: How much do you know about internet safety?

Staying safe on the web Q&A

One girl's tale of danger online

Newsround special: Caught in the Web

Caught in the Web is the latest Newsround special programme, and it's all about staying safe on the internet.

The show, which is voiced by David Tennant, tells the story of a girl called Lonely Princess, who gets into danger after meeting someone in a chatroom.

It also has lots of tips on how to be safe, and case studies of children with real-life experiences of how things can go wrong.

Monday 26 September 2011 11:00 – Site Update

The Resources area is functioning as normal following recent updates to the website. Users that were having difficulties downloading some of the Thinkuknow trainer's resources should now have full access to their accounts. Once again we apologise for any inconvenience this may have caused. If you are still experiencing problems please contact ***education@ceop.gov.uk****.*

You can download the resources most appropriate for the young people you are working with by selecting them and adding them to your basket. When you are happy with your selection proceed to checkout. The resources you have selected will be downloaded onto your pc.

Facebook suggestions

- The terms and conditions for Facebook state that users need to be 13 years of age. Anyone under that age who has an account is violating the terms and conditions and you can report them.
- Set boundaries for your younger children and explain that, as with other forms of media, there are age restrictions on using certain websites.
- Create a Facebook account yourself and be 'friends' with your teenage children. This will enable you to monitor what they post on their wall and who they add as 'friends'.
- Ensure that your teenage children are aware of some of the potential risks on Facebook, make sure that they download the ClickCEOP application.

Facebook suggestions

- There are a number of excellent films that highlight the danger or adding 'Friends' that you don't know in real life to social network sites. CEOP have produced two films:
  - **Key Stage 2** - Jigsaw
  - **Key Stage 3/4** - Consequences
- You may also like to look at the film Ellie's Story from South West Grid for Learning.

Watch a video to learn more about SafeSearch

Enable the SafeSearch filter

1. Visit the Search Preferences page.
2. In the SafeSearch Filtering section, choose the SafeSearch level you'd like to use:
   - **Strict filtering** filters sexually explicit video and images from Google Search result pages, as well as results that might link to explicit content.
   - **Moderate filtering** excludes sexually explicit video and images from Google Search result pages, but does not filter results that might link to explicit content. This is the default SafeSearch setting.
   - **No filtering,** as you've probably figured out, turns off SafeSearch filtering completely.
3. Click **Save Preferences** at the bottom of the page when you're done setting your preferences.

FAQ

We know how important it is to protect and educate young people on using the Internet and want to provide all of our users with a safe experience.

When it comes to family safety, we aim to:

- Provide parents and teachers with **tools** to help them choose what content their children see online
- Offer **tips and advice** to families about how to stay safe online
- Work closely with **organizations** such as charities, others in our industry and government bodies dedicated to protecting young people

View more safety videos on our YouTube channel

Google safety tools

We build tools into our products that help you manage Internet safety. SafeSearch and YouTube Safety Mode help you control the type of content you see on these services and you can learn more about these here.

Internet safety for children

Internet safety advice and safe links for kids and parents. Internet safety for children's mobile phones and smartphones. Internet safety for iOS, iPad, iPod, iPhones.

A few basics

Always supervise children & teenagers using the internet. This does not mean looking over their shoulder the whole time (you haven't got the time and they won't thank you for it). Let your child enjoy using the internet as safely as possible by making sure all internet-enabled devices are safely set up, by keeping updated on the latest developments and being aware of your kids' online activities.

Computers. No parental filter is foolproof so be aware of your child's internet use by keeping computers & laptops & other mobile devices in rooms used by all the family.
Set up parental controls e.g. for Windows, click the *Windows* button then *Control Panel* then *User Accounts* and *Family Safety* to make user accounts and set parental controls. Check your search engine is set to ultra safe search. e.g. on Google click *settings* then *search settings* then scroll down and select *strict filtering* then *save preferences*.
Warn children not to give out any personal details or meet anyone off-line. Look at the sites they visit and, if appropriate, make sure they are monitored by a moderator. Set strict privacy settings for Facebook.

Mobile phones. It's easy to forget that smart phones have internet access. Call your phone provider and ask them to add parental restrictions to your child's mobile phone account. You can also download safe browsers for a small fee (e.g. www.mobicip.com for iPhones, Android etc.).

iOS, iPad, iPhone, iPod. The default browser on mobile Apple devices is Safari which *cannot* be set to restrict inappropriate sites. But you can disable Safari and replace it with a family-friendly browser app. (e.g. www.mobicip.com, http://www1.k9webprotection.com/, see
